SUMMARY

Artificial Intelligence student with hands-on experience in Machine Learning, Deep Learning, Computer Vision, and Data Analysis. Experienced in developing machine learning pipelines, preprocessing and analyzing datasets, handling imbalanced data, building classification models, and evaluating model performance. Proficient in Python, Scikit-learn, TensorFlow, Keras, OpenCV, MediaPipe, Pandas, and NumPy.

EDUCATION

Badr University in Assiut – B.Sc. Artificial Intelligence 2023–2027

EXPERIENCE

Machine Learning Trainee – Digital Egypt Pioneers Initiative (DEPI) 2026

Microsoft Machine Learning Track

- Developed classification and regression models using Python and Scikit-learn across multiple machine learning tasks.
- Applied data preprocessing, feature engineering, supervised learning, and model evaluation techniques to build machine learning workflows.

AI Intern – Evergreen.AI, Assiut, Egypt 2026

- Performed data preprocessing and exploratory data analysis using Pandas, NumPy, Matplotlib, and Seaborn.
- Created data visualizations, extracted dataset insights, and prepared structured data for machine learning tasks.

Machine Learning Trainee – National Telecommunication Institute (NTI) 2025

- Built classification and regression models using Python and Scikit-learn across machine learning tasks.
- Applied preprocessing, feature engineering, model evaluation, and imbalanced-data handling techniques.

CIB Summer Internship 2026

- Completed a professional banking internship focused on teamwork, communication, problem-solving, and exposure to real-world business operations and financial services.

PROJECTS

Brain CT Scan Classification – Deep Learning

- Developed and evaluated deep learning models for brain CT scan image classification using VGG16 and ResNet50.
- Achieved 93.93% test accuracy with VGG16 and 96.32% test accuracy with ResNet50.
- Compared 2 deep learning architectures to evaluate the impact of transfer learning on classification performance.

YOLO Object Tracking Speed Comparison – Computer Vision

- Benchmarked 3 lightweight YOLO models – YOLOv10n, YOLO11n, and YOLO12n – for real-time object tracking using ByteTrack.
- Achieved 32.80 FPS with YOLOv10n, 28.67 FPS with YOLO11n, and 27.91 FPS with YOLO12n.
- Identified YOLOv10n as the only model meeting the 30 FPS real-time processing threshold.

MNIST Digit Recognition – Deep Learning

- Developed neural network models for handwritten digit classification using 60,000 training images and 10,000 test images.
- Achieved 99.04% test accuracy using Adam optimization and 97.02% using SGD.
- Compared 2 optimization strategies to evaluate their impact on MNIST classification performance.

Breast Cancer Classification – Machine Learning

- Compared 5 Logistic Regression approaches, including L1, L2, Elastic Net, and custom Gradient Descent implementations.
- Achieved 98.25% accuracy using a custom Logistic Regression implementation.
- Evaluated regularization and optimization strategies for binary classification performance.

SKILLS

Programming: Python, SQL, C++, JavaScript

Machine Learning: Scikit-learn, Supervised Learning, Regression, Classification, Feature Engineering, SMOTE, Model Evaluation

Deep Learning: TensorFlow, Keras, PyTorch, CNNs, Transfer Learning, Neural Networks

Computer Vision: OpenCV, YOLO, MediaPipe, Face Mesh, Object Tracking, ByteTrack

Data Science: Pandas, NumPy, Matplotlib, Seaborn, EDA, Data Preprocessing

Tools: Git, GitHub, Jupyter Notebook, Google Colab

ACTIVITIES

Hult Prize – Vice, Media Committee: Supported media strategy, content creation, branding, and promotional activities for entrepreneurship and innovation events.

Google Developer Groups (GDG Assiut) – Graphic Designer: Created visual content and branding materials for technology events and community activities.

IEEE Student Branch – Media Committee Member: Supported media coverage, visual content, and promotional activities for technical events.

Rally BUA – Media Committee Vice: Supported marketing, branding, and event media activities for university activities.

LANGUAGES

Arabic (Native) | English (Good)
